

TRANSFORMATION

Mistake is the mother of success

PRIME Minister Datuk Seri Najib Razak has sowed the seeds of transformation.

Success requires people at all levels to play an active part in this transformation process.

The authorities must keep matters in focus and pursue them fervently, and the public must offer feedback to keep our leaders informed.

Resistance to change, however, is quite understandable. It is the general nature of all human beings.

It includes fear of making mistakes, fear of reprimands, lack of motivation or loyalty, old age, and ungratefulness.

But mistake is the mother of success. Many discoveries, inventions, and achievements in the world have been made from mistakes.

If we do not want to make a mistake, then do nothing and nothing will happen.

The admission of mistakes by Najib recently is an act of strength and courage, and not weakness.

The greatest mistake of all is possibly to trumpet others' mistakes and hide our own.
